

Caribbean SME ERP + POS — one place to run the shop.

Affordable cloud software for Trinidad & Tobago and Caribbean small businesses that currently run on WhatsApp, spreadsheets, and notebooks. Live product: <https://cbmanagement.vercel.app>

PROBLEM

Operators lose money when orders, stock, jobs, invoices, and cash live in different places. Global POS tools are USD-priced and retail-biased; enterprise ERP is too heavy.

SOLUTION

Self-serve SaaS that covers sell → operate → know: POS, inventory, customers, jobs, invoices, payments, expenses, and plain-language reports — with TTD and VAT controls.

MODEL

TT\$99–750+

Monthly subscriptions ·
flagship Business TT\$199 · no
setup fees

BEACHHEAD

T&T

Trades + mixed retail/service
SMEs, then wider Caribbean

STATUS

Production V1 on Vercel ·
Supabase Auth · Postgres
data

WHY WE WIN

- Retail + service in one app (not POS-only)
- TTD pricing and local VAT toggle
- Signup that shapes the product for how you earn
- Founder-led build already shipping in production

THE ASK

TT\$25,000–40,000 seed for customer acquisition, local support, and product hardening while converting trials to paid Business plans.
