

CBMANAGEMENT

Run your entire business from one place.

Affordable cloud ERP + POS for small businesses in Trinidad & Tobago and the Caribbean — built for WhatsApp-era operators, not enterprise IT teams.

Live product · <https://cbmanagement.vercel.app>

PROBLEM

Caribbean SMEs run on chaos stacks

Today's reality

- WhatsApp for orders & customer chat
- Spreadsheets for stock & jobs
- Notebooks for expenses
- Separate tools for invoicing

What breaks

- Lost information between chats & books
- Late invoices and weak collections
- No clear cash-flow visibility
- Hard to know if a job actually made money

Enterprise ERPs are too expensive and too complex. Generic global tools ignore TTD pricing, local VAT, and how Caribbean service + retail shops actually work.

SOLUTION

One business OS for retail & service

Sell

POS, receipts, fixed-price services, VAT/tax controls, printers.

Operate

Customers, inventory categories, jobs/quotations, suppliers, employees.

Know

Plain-language dashboard + colourful reports: income, expenses, by item/category.

Designed for signup reality

Choose **Retail**, **Service**, or **Both** — the app shapes navigation and home layout around how you earn.

PRODUCT

Live production app

- Supabase Auth (real accounts)
- Postgres-backed business data
- POS + inventory + services
- Invoices, payments, expenses
- Settings: theme, language, VAT, printers
- Reports with search by item & category

cbmanagement.vercel.app

V1 modules shipped

Dashboard · Customers · Quotations · Jobs · Invoices · Payments
· Expenses · Inventory · Suppliers · Employees · Reports · POS ·
Settings

Built with Next.js, TypeScript, Prisma, Supabase Auth, Postgres,
Vercel.

MARKET

Caribbean SME software, starting in T&T

ICP

Trades, contractors, repair shops, bakeries, hardware, beauty, and mixed retail/service businesses that outgrew notebooks.

Beachhead

Trinidad & Tobago first — TTD pricing, local VAT, WhatsApp-era workflows — then wider Caribbean.

Why now

Cloud + phone adoption is high; operators want simple SaaS, not accountant software or US-priced POS stacks.

Market sizing detail lives in the business plan; interview packet is being completed for cohort submission.

COMPETITION

Where we win

ALTERNATIVE	GAP	CBMANAGEMENT WEDGE
WhatsApp + Excel	No system of record	One app for sell → stock → cash
Global POS tools	USD pricing, retail-only bias	TTD SaaS; retail + service together
Enterprise ERP	Cost + implementation burden	Self-serve, no setup fees
Accounting-only apps	Weak ops/POS/jobs	Operations-first dashboard

Subscription-only SaaS

Pricing (TTD, VAT-exclusive)

Starter	TT\$99 / mo	TT\$999 / yr
Business (flagship)	TT\$199 / mo	TT\$1,999 / yr
Professional	TT\$399 / mo	TT\$3,999 / yr
Enterprise	TT\$750+ / mo	TT\$7,500+ / yr

Model notes

- No setup / onboarding fees
- Blended ARPU target ≈ TT\$199
- Extra seats ~TT\$25–40 / user / mo
- Annual ≈ 2 months free vs monthly

TRACTION

Shipped in production

Live

Public HTTPS app on Vercel with real signup/sign-in.

V1

Full SME module set: POS, inventory, jobs, invoices, reports.

TTD

Native currency, VAT toggle, Caribbean-first UX copy.

Near-term traction goals

≥25 qualified external users (cohort pass gate) · first paying Business subscriber · WhatsApp/trade group pilots in T&T.

Win shops where they already gather

Channels

- Direct outreach to trades & retailers
- WhatsApp business groups
- Facebook / Instagram local ads & demos
- Accountant & consultant partnerships

Motion

- 14–30 day free trial
- Industry templates (trades first)
- Retail POS-first onboarding
- Service job + invoice workflows

FINANCIALS (CONSERVATIVE)

3-year subscription ramp

Year 1

~15

Avg paying customers · EOY ~25 ·
ARPU TT\$199

Year 2

~50

Avg paying customers · EOY ~70

Year 3

~120

Avg paying customers · EOY ~160

Assumptions

~3% monthly logo churn · founder-led Year 1 · seed capital midpoint TT\$30k (range TT\$25–40k) · VAT excluded from plan figures.

Founder-led build, capital to accelerate

Team

- **@kureen-cyber** — founder / builder
- Hult Cohort Developer Program Summer Pilot 2026
- Shipping agent-assisted product development

The ask

TT\$25,000–40,000 seed to fund customer acquisition, local support, and product hardening (monitoring, privacy, multi-tenant depth) while converting trial SMEs to paid Business plans.

One place to run the Caribbean SME.
